

A line drawing of a plant with a syringe injecting liquid into its stem. The plant has a central stem that branches into two main roots, each of which further branches into several smaller roots. A syringe is shown at the top, with its needle inserted into the central stem of the plant. The syringe is tilted upwards and to the right. The plant is shown in cross-section, revealing its internal structure. The label 'FIG. 1' is located in the bottom right corner of the drawing.
